

Hyacinthoides Non Scripta (English Bluebells) 'In the Green'

We can now supply the Bluebells during January and February 2010 **complete with foliage**. This is, without doubt, the best way to

Hyacinthoides Non Scripta *rich violet blue, flowering May*

Leucojum

Commonly called the Summer Snowflake, L. Aestivum are ideal for borders, naturalising, for cut flowers. Flowering April/May.

Aestivum	<i>white, large flowering</i>	Height 35 cm
-----------------	-------------------------------	------------------------

Muscari (Grape Hyacinths)

All Muscari are of dwarf habit and lend themselves to naturalising, to the rockery, border clumps, terrace containers and window boxes. Flowering in April. They are also useful for cultivation in pots and bowls.

		Height	6/7 cm	7/8 cm
Armeniacum	<i>bright blue</i>	15 cm		
Latifolium	<i>light blue tip, dark blue base</i>	25 cm		
Mount Hood	<i>dark blue, topped white</i>	15 cm		
Valerie Finnis	<i>pale lavender blue</i>	15 cm		
Venus	<i>white</i>	15 cm		

Ornithogalum

These unusual members of the Lily family flower March-April. They are ideal for naturalising in woodlands, shrubberies, grassy banks or borders.

		Height
Umbellatum	<i>white (Star of Bethlehem family)</i>	15 cm

Oxalis

Stunning clover-like foliage make these ideal for potting and in borders. Varieties offered are non-invasive

		Height
Adenophylla	<i>lilac pink flowers above stunning grey-green foliage</i>	15 cm

Puschkinia

Drifts of Puschkinia in partially shaded positions create a most pleasing effect in the garden in March and April. They also like sunny spots in the rockery and do well in containers.

		Height
Libanotica	<i>porcelain blue</i>	12 cm

Ranunculus

An excellent flower for beds, borders and rockeries. It is also ideal for cut flower use in May-August.

Paeony Flowering Mixed		Height 20 cm
